

COMUNICATO STAMPA

ANTARES VISION GROUP: THE NEXT-GEN OF QUALITY INSPECTION FOR FOOD

Anuga Foodtec: from product quality inspection to the digital transformation of the supply chain through an ecosystem of technologies, solutions, and expertise.

Cologne, Anuga FoodTec 26th April 2022 – **Antares Vision Group**, **technological partner of excellence in digitalization and integrated data management**, the global leader in track and trace hardware and software solutions, and one of the main players in inspection systems for quality control, will be present at **Anuga Foodtec, Cologne, April 26-29 (Hall 7 D060-E061)** with an ecosystem of solutions and technologies that arise from the synergy of experiences and skills within the Group.

Antares Vision Group, whose mission is precisely to **accelerate technological innovation and digitalization, by connecting the physical and digital worlds** with the integrated value chain, will be attending Anuga Food Tec with its stand (Hall 7, Stand D060, E 061) and with a new positioning, resulting from the birth of the Group and the synergy of expertise of various companies. During the event, all the solutions that are part of the Group's technological ecosystem will be presented:

Inspection for quality control

Thanks to the expertise of FT System, and Pen-tec, which specialized in inspection controls and present in the Food and Beverage market for over twenty years - Antares Vision Group - Food, is offering a unique multi-technological portfolio on the market that led to the All-In-One series, revolutionary because in a single machine it brings together several technologies dedicated to inspection in the Food sector, confirming the commitment as a technological partner of excellence in quality control, able to meet the requests from all stakeholders in the supply chain.

All-in-One:

- a single solution for the inspection of microholes, X-ray control and weight control;
- a single solution for the inspection of microholes, welding control, and label control.

IE 4000 for the inspection of micro-holes with 360 ° reconstruction of the label (sauce, jams, ketchup, mayonnaise)

End-to-end traceability for Food, from the raw material to the end-user

Thanks to the expertise in track and trace, it will be presented a dedicated traceability platform for Food [demo software at the booth], enabling data collection from raw materials [from the field directly], a single digital identity, and monitoring along the supply chain up to the end-user.

The collection and interconnection of data (quality, traceability, IOT devices, and data of each step of the supply chain) contribute to the construction of a transparent and complete supply chain of information, offering the end-user the opportunity to know and verify the integrity and history of each product. Furthermore, through the creation of digital identities, even for each product it is possible to offer a unique experience and an open dialogue with the end-user, based on transparency that generates trust: the Trustparency® promise.

Digital Factory, production efficiency, maintenance optimization, supplier analysis, through the data collection [from production, quality control, traceability, existing management solutions] it is possible to monitor efficiency, optimizing and correlating analyzes and statistics also through artificial intelligence.

COMUNICATO STAMPA

The opportunity is important to position ourselves as a preferred partner and single point of contact for all interlocutors in the Food supply chain, in the field of **inspection and quality control**, strengthened by expertise and a unique multi-technological portfolio on the market, but also as a partner technology **for digital transformation of supply chains**, thanks to our experience and synergies within our Group.

MEET ANTARES VISION GROUP

ANUGA FOODTEC, 26-29 APRIL - HALL 7 - D-060/E-061

Demo Line: HALL 8 - D080 / E099 (daily at h.11.00 a.m and at h 3.00 p.m)

27 APRIL 2022 - h. 11.30 a.m. "LEVERAGING PRODUCT QUALITY INSPECTION TO IMPROVE SUPPLY CHAIN TRANSPARENCY" –Speaker Corners, Passage 4/5

ABOUT ANTARES VISION GROUP

Antares Vision Group is a technological partner of excellence in digitalization and innovation for companies and institutions, to guarantee the safety of products and people, the competitiveness of businesses and protection of the planet. It offers a unique and complete ecosystem of technologies to guarantee product quality (inspection systems and machines) and product traceability along the supply chain (from raw materials, to production, from distribution to the consumer), with integrated management of data, production and the supply chain, also through the application of artificial intelligence and the use of blockchain. Antares Vision Group is active in the life sciences sector (pharmaceuticals, biomedical devices and hospitals), in food and beverage, in cosmetics and is expanding into other sectors.

Since 2019, part of Antares Vision Group, FT System brings over 20 years of experience in the field of inspection and quality control in the bottling sector. Pen-tec since 2021 in Antares Vision Group, gathers experience and technologies in food inspection.
