

## **PRESS RELEASE**

### **FROM FT SYSTEM TO ANTARES VISION GROUP: THE NEXT-GEN OF QUALITY AND DIGITALISATION SHOWCASED AT DRINKTEC WITH AN ECOSYSTEM OF TOP-NOTCH PRODUCT AND SUPPLY CHAIN TECHNOLOGIES**

*Antares Vision Group, which FT System has been a part of since 2019, will put on display a comprehensive array of technologies at Drinktec - innovations in quality assurance as a result of leveraging an over 20-year experience in packaging and product inspection checks, as well as digital innovation solutions connecting the physical into the digital world - with a view to vouching for safety, efficiency and sustainability.*

**Munich, 12 September 2022** – After more than four years of waiting, a heedful light full of high expectations will finally materialise in terms of innovation and sharing at Drinktec 2022 edition.

The first novelty is ground-breaking: the experience and expertise of FT System, a leader in quality assurance inspection, go hand in hand paving the way to an array of top-notch technologies by Antares Vision Group, geared towards endorsing safety, efficiency and sustainability for products and supply chains.

Maintaining and further strengthening its position in the **Beverage industry**, FT System will not only continue along its path of developing technological innovation for quality assurance, but will even expand the offer through a parade of product and supply chain digitisation solutions.

**As a result, FT System will be present at Drinktec (Hall A6 Stand 115 ) as Antares Vision Group**, a technological partner of excellence in digitisation and integrated data management, as well as a global leader in traceability solutions and one of the main players in quality assurance inspection systems. The exhibition, which will be held at *Messe München* **from 12 to 16 September**, is a milestone for innovative solutions tailored to the Beverage sector - especially when it comes to quality assurance - and a breeding ground of **solutions for product traceability, production process efficiency and integrated data management, with a view to guaranteeing safety, efficiency and sustainability, within a new sentiment of final consumer confidence.**

The second innovation concerns cutting-edge quality assurance solutions both in terms of **technologies** and **services** for the Beverage industry: from the use of laser spectroscopy to check for leaks and for presence of gas in bottle headspace, through to the inspection of tethered caps, to robotic systems for in-line non-destructive inspections.

**Last but not least, the third new addition encompasses all technologies for the traceability, digitisation and intelligent use of data which, by leveraging Antares Vision Group's expertise**, can indeed safeguard brands against counterfeiting and parallel markets while ensuring compliance with traceability regulations (for example Russia), as well as savvy product recall management, supply chain transparency, from the raw material to the final consumer, by also creating a customised experience.

## **PRESS RELEASE**

During the days of the event, **Antares Vision Group** will arrange English-speaking in-depth briefings focused on technologies and innovation trends on a daily basis.

### **SCHEDULE**

**Monday 12 - 14:30-14:50**

**FOOD & BEVERAGE TRANSPARENCY. WHY YOU MUST ACT NOW**

HALL A6, STAND 115

Lecturer: Simon Jones

**Tuesday 13 - 10:00-10:30**

**DIGITAL FACTORY: FROM QUALITY DATA TO OPTIMISE BOTTLING LINE EFFICIENCY**

Inspiration.hub - HALL B3

Lecturers: Emanuele Melloni, Thierry Protas

**Tuesday 13 - 11:30-11:50**

**LEAK DETECTION SYSTEM FOR BEER: THE INNOVATIVE APPLICATION OF LASER SPECTROSCOPY**

HALL A6, STAND 115

Lecturers: Fabio Marezza, Paolo Tondello

**Tuesday 13 - 14:30-14:50**

**TETHERED CAP: OUR SOLUTION TO INSPECT IT**

HALL A6, STAND 115

Lecturer: Maribel Rodriguez

**Wednesday 14 - 11:30-11:50**

**COMPLETE EMPTY CAN INSPECTION FOR HIGH-SPEED PRODUCTION LINES**

HALL A6, STAND 115

Lecturer: Matt Magnan

**Wednesday 14 - 14:30-14:50**

**ROBO-QCS: A UNIQUE ROBOTIC SYSTEM FOR AUTOMATIC QUALITY CONTROLS AT THE FILLER. TORQUE, FILLING VOLUME, INTERNAL PRESSURE, TPO, BRIX, DIET, ALCOHOL, CO<sub>2</sub> AND O<sub>2</sub>**

HALL A6, STAND 115

Lecturers: Emanuele Melloni, Pietro Bracchi

**Thursday 15 - 11:30-11:50**

**ARTIFICIAL INTELLIGENCE AND THE EMPTY BOTTLE INSPECTION TO OPTIMISE QUALITY CONTROL**

HALL A6, STAND 115

Lecturer: Gionatan Gualazzini

## **PRESS RELEASE**

**Thursday 15- 14:30-14:50**

**TRACK AND TRACE SOLUTIONS FOR YOUR RETURNABLE ASSETS**

HALL A6, STAND 115

Lecturers: Nicola Franzelli, Olivier Fantone

**Friday 16 – 11:30-11:50**

**CREATING UNIQUE DIGITAL IDENTITIES WITH SERIALISATION: THE SOLUTIONS FOR THE BEVERAGE INDUSTRY**

HALL A6, STAND 115

Lecturer: Nicola Franzelli

**MEET ANTARES VISION GROUP**

**DRINKTEC, 12-16 SEPTEMBER - HALL A6 – Stand 115**

### **ANTARES VISION GROUP**

Antares Vision Group is a technological partner of excellence in digitalisation and innovation for undertakings and institutions, to guarantee the safety of products and people, the competitiveness of businesses and the protection of the planet.

It provides a unique, comprehensive range of technologies to guarantee product quality (inspection systems and machines) and product traceability along the supply chain (from raw materials to production, from distribution to the consumer) by leveraging the integrated management of production and supply chain data, as well as applying artificial intelligence and blockchain technology. Antares Vision Group is active in the life science (pharmaceutical, biomedical devices, and hospitals), beverage and food, cosmetics sectors, and has potential in other sectors.

A part of Antares Vision Group, FT System has brought over 20 years of experience into the fields of inspection and quality assurance in the bottling sector since 2019.
